PMT

0. EventNo: Event number (starting from 0)

1. PMTNo: PMT number (100 - 299)

2. Photon_Count: Total count of photons that hit the PMT in an event

3. Total_Energy: Total energy deposited in the PMT in an event (MeV)

4. First_Hit_Time: Time of the first hit on the PMT in an event (ns)

5. Average_Hit_Time: Average time of all hits on the PMT in an event (ns)

6. First_Prompt_Hit_Time: Time of the first hit on the PMT in the first microsecond in an event (ns)

7. First_Delayed_Hit_Time: Time of the first hit on the PMT after the first microsecond in an event (ns)

8. Average_Prompt_Hit_Time: Average time of all hits on the PMT in the first microsecond in an event (ns)

9. Average_Delayed_Hit_Time: Average time of all hits on the PMT after the first microsecond in an event (ns)
